

PLURYAL SILK

A Regenerative Beauty Innovation

**YOUR MOST
BEAUTIFUL
AGE IS NOW!**

Pluryal

WHAT IS A SKIN DENSIFIER?

You must have heard about the “skin booster” which is a type of dermal filler used to improve the skin’s quality by boosting hydration levels deep within the skin and increasing its smoothness, elasticity and firmness.

A skin “densifier” is a skin healer that goes even further as it also boosts collagen production and complements the skin’s natural ability to self-repair.

AS
SOFT
AS
SILK

WHAT IS PLURYAL SILK?

Pluryal SILK is a skin densifier, composed of high purity polynucleotides, a natural component extracted from salmon sperm and totally degradable. Polynucleotides are scientifically proven to repair, nourish and revitalize the skin of the face and body’s delicate areas. In addition to their moisturizing properties, they have a trophic effect on fibroblasts, which are the cells responsible for collagen production within our skin.

WHAT CAN PLURYAL SILK DO FOR YOU?

Thanks to its unique composition, Pluryal SILK:

- Improves the hydration and texture of the skin, mainly its elasticity.

- Decreases the signs of fatigue.

- Repairs the skin’s metabolism.

- Reduces fine lines in younger skin.

**Pluryal silk,

WHAT ZONES OF YOUR FACE AND BODY CAN BE TREATED WITH PLURYAL SILK?

Pluryal SILK is a repair treatment for the skin of the face and body's delicate areas.

In the face:

Eye contour
Area around the mouth
Neck
Décolletage
Acne Scars in complementary of EBD procedure or peeling

In the body:

Abdomen (postpartum stretch marks on the abdomen in complementary of EBD procedure)
Chest
Inner arms

WHO CAN BENEFIT FROM PLURYAL SILK?

Everyone can benefit from this treatment, **but mainly patients who are:**

- Young and worried about the signs of aging and want to prevent them
- Looking for flawless skin
- Looking for natural results
- Searching for treatment options different from fillers and botulinum
- Living in big polluted cities

IS THE TREATMENT SAFE?

Pluryal SILK is a CE certified injectable gel. Its manufacturing process and specifications are compliant with EU regulations for injectable implants. Moreover, its component is highly purified, and totally degradable.

IS THERE ANY RECOVERY TIME?

The treatment with Pluryal SILK is a lunchtime treatment; it's a trauma-free gentle method and quick procedure. However, after product injection, you might experience redness, swelling, and edema which will naturally disappear in a couple of days. If the side effects persist, inform your practitioner.

HOW MANY TREATMENTS DO YOU NEED?

It will depend on your age, skin condition and the treated area. Usually, the number of sessions ranges between 3 to 5 treatments with an interval of 3 weeks between each session. In order to be kept in good condition, your skin needs regular maintenance, therefore the treatment course should be repeated every 2 to 3 months.

HOW IS PLURYAL SILK DIFFERENT FROM A DERMAL FILLER?

Pluryal SILK is a skin healer which will repair the texture and condition of the skin of the face and body's delicate areas whereas the dermal filler has a "filling" property, which means that it does not repair the skin, but only fills out the lost volume.

a smoother,
firmer, and more
elastic skin
